

Two-Day Delivery Plan

Sales case study · pricing, profitability & elasticity

Day one gets the data trustworthy and the core metrics right. Day two turns those metrics into elasticity findings, a dashboard and a presentation.

Schedule Detail & Milestones

Full task table, effort split by track and delivery milestones

Day	Start	End	Hrs	Track	Task	Detail
Day 1	08:00	09:00	1	Story	Kick-off & brief breakdown	Restate the seven questions, agree definitions for price, GP% and promotion
Day 1	09:00	11:00	2	Data	Data audit & cleaning	Load workbook, check 1,053 rows, date continuity, zero/negative checks
Day 1	11:00	13:00	2	Analysis	Derive core metrics	Unit price, unit cost, gross profit, GP% per day and per unit
Day 1	13:30	15:00	1.5	Analysis	Trend & seasonality view	Monthly and day-of-week aggregation, price drift, volume rhythm
Day 1	15:00	16:30	1.5	Analysis	Flag promotional periods	28-day trailing price baseline, 5% discount threshold, window grouping
Day 1	16:30	18:00	1.5	Review	Day 1 findings checkpoint	Sanity-check the negative margin result against the raw workbook
Day 2	08:00	10:00	2	Analysis	Elasticity modelling	Base vs promo price and volume, PED per window, profit impact
Day 2	10:00	13:00	3	Build	Dashboard build	KPI band, price, margin, elasticity and weekday charts
Day 2	13:30	15:00	1.5	Story	Recommendations drafting	Margin floor, promo depth, cost validation, weekend weighting
Day 2	15:00	16:30	1.5	Story	Presentation assembly	Ten slides mapped one-to-one onto the case study questions
Day 2	16:30	18:00	1.5	Review	QA & rehearsal	Recalculate figures, proof slides, dry-run the walkthrough

Hours by track

Milestone • end of day 1

Clean dataset with verified daily price, cost and gross profit, plus a flagged list of promotional windows.

Milestone • midday 2

Elasticity per promotional window and a working dashboard covering every question in the brief.

Milestone • end of day 2

Presentation finalised, figures recalculated from source and the walkthrough rehearsed once end to end.
